

Timeless Eternal Hope

You Are Allowed to Exist

For Partners

Delivering the permission to be —
through memory, infrastructure, and independence.

Maui, Hawai'i

Mission

We deliver “You are allowed to exist” to those who need to hear it.

Not just words. We make it tangible.

Engrave — Proof of Existence

“You were here. You existed. Your life had meaning.” Laser-engraved memories that last — from natural materials to eternal quartz glass, matched to your intention.

Protect — Disaster-Proof Memory

Quartz glass. QR archives. Multi-layered backup for eternity. Even if the stone crumbles, the memory remains.

Empower — Off-Grid Independence

Exist without permission from existing systems. Solar power. Satellite internet. Self-sufficient infrastructure.

The Founder

Takuya Sato

I grew up not knowing the beginning of my own story. My birth time was unclear. No accurate record existed.

It may seem trivial — just a birth time. But it’s the first imprint of a life. Without it, you cannot ask the stars “Who am I?”

When your existence isn’t engraved, you’re left wondering: “Am I allowed to be here?”

That question shaped everything I do.

Background:

- 20+ years in digital transformation and AI
- Former Fujitsu engineer (4 years)
- Former CTO at Willgate, a venture company (7 years)
- Former Senior Specialist at Deloitte Tohmatsu Consulting (5 years)
- Forbes JAPAN contributor
- World Blockchain Summit Top 10 Project Leaders

Today, I combine strategic expertise with hands-on implementation. I don't just advise — I build.

The Family

A Family of Three — Always Together

We travel and work as a unit. This is not negotiable. Our family stays together.

Takuya — Infrastructure & Engraving: System design, off-grid construction, disaster resilience, technical leadership.

Mina — Marketing & Craft: 18 years of pet care experience. Resin art, dried flower preservation, handmade soap. Digital marketing and social media. The heart of our gift economy practice.

Our daughter (5 years old) — Explorer: Curious about nature, animals, and everything. Learning English through immersion. The reason we prioritize family-first in every decision.

We don't separate work and life. Our daughter sees us build, create, and contribute. This is how we teach her that she, too, is allowed to exist.

Family-first means: We need a comfortable environment for our family — kitchen, laundry, space for a child to play. Condo, hotel, single-family home — the format doesn't matter.

Pearl's Story

Named in Memory of Pearl (2007–2025)

For 18 years, Pearl — a toy poodle — lived as part of our family. In his final years, his body couldn't move freely. Family outings became impossible. We gave up our freedom to travel.

In January 2025, Pearl quietly passed away.

We couldn't let him go. We placed his remains in a portable memorial made of shells and resin. In that moment, we realized: We could go anywhere with Pearl. He would see the ocean he never saw in life.

By creating a portable grave, we reclaimed our freedom. And Pearl now travels to more places than he ever did in life.

This is why we engrave. This is why we preserve. This is why "Pearl Memorial" carries our mission forward.

Why Maui

We are not tourists.

Our ancestors' graves rest on this island. We are here as grave keepers — those rooted in this land, bearing the responsibility of memory.

After the 2023 Wildfires:

We came to Maui as disaster recovery volunteers. Not to visit. Not to vacation. To contribute.

We've built off-grid solar systems for temporary housing. We've maintained grounds the size of an elementary school. We've integrated into the community — not as outsiders helping, but as family returning home.

Standing with the community in recovery.

This is personal. This is ancestral. This is why we're here.

Our Approach

Gift Economy: First, We Give

Before we ask for anything, we give. Handmade soap. Free WiFi. Technical knowledge. Time and presence.

By giving without expecting return, trust is born. Relationships form. Community recognizes us not as strangers, but as members.

A Real Example:

We distributed handmade soap — worth a few dollars — to community members. We shared our story. We asked for nothing.

Weeks later, when we needed support, they remembered us. "The family supporting the recovery." They opened doors worth thousands of dollars in value.

This isn't magic. This is what happens when "transaction between strangers" transforms into "community sharing face and context." The rules of exchange change.

Independence Philosophy

You can exist without depending on existing systems.

This is not anti-establishment. This is resilience.

- **Without Power Companies** — Off-grid solar. Generate your own electricity.
- **Without Telecom Companies** — Satellite internet. Connect from anywhere.
- **Without Permission** — Your existence doesn't require approval from anyone.

In disaster zones, infrastructure fails. Power grids go down. Cell towers stop working. Those who depend entirely on systems become helpless.

We teach and build independence. Not to escape society, but to remain standing when society temporarily falls.

Disaster Resilience

Why Disaster Recovery?

Because when everything is lost, what remains is memory and the will to rebuild.

The 2023 wildfires destroyed homes, businesses, and lives. But they also revealed something: communities that had resilient infrastructure — physical and social — recovered faster.

Our Role:

We don't just donate money. We build systems.

- Off-grid power that works when the grid doesn't
- Communication networks that function when cell towers fail
- Documentation systems that preserve memory even when physical objects are destroyed

Disaster recovery is not charity. It's infrastructure for dignity.

When you can power your own home, connect with your family, and preserve your memories, you retain agency. You remain a person, not a victim.

Impact

What We've Built

Project 1: Disaster Recovery Site, West Maui

- Complete off-grid solar system for temporary housing
- Duration: 1 month
- Scope: Grounds maintenance, power infrastructure, system design
- Scale: Property the size of an elementary school

Project 2: Off-Grid Farm, West Maui

- Built complete living/working infrastructure in 3 days
- 24-hour internet connectivity (satellite + mesh WiFi)
- Hybrid power system (solar + generator + battery)
- Ice-cycle refrigeration system
- Comfortable environment for family of three

What "3 days" means:

Day 1: Arrived to no running water, no stable power

Day 3: Full business operations running — Mac Studio, MacBook Pro, 24-hour connectivity, refrigeration, cooking, comfortable living

This is what we do. We arrive, assess, and build.

By the Numbers

Metric	Value
Days to build complete off-grid environment	3
Hours of daily internet connectivity	24
Years of DX/AI experience	20+
Years at enterprise companies	9
Years as startup CTO	7
Family members working together	3

Technical Expertise

What We Build

Power Systems:

- Solar panel arrays (design, installation, optimization)
- Battery systems (lithium, AGM, hybrid configurations)
- Generator integration (automatic switching, fuel optimization)
- Load management and prioritization
- 24-hour power availability in off-grid environments

Communication Systems:

- Satellite internet deployment
- Mesh WiFi network design (whole-property coverage)
- Independent power supply for 24-hour connectivity
- Captive portal setup for guest networks

Infrastructure Integration:

- Hybrid power + communication + refrigeration systems
- Redundancy design (backup for every critical system)
- Resource optimization (ice-cycle cooling, scheduled charging)
- Rapid deployment (functional systems in days, not weeks)

Documentation & Training:

- System documentation for handoff

- Training for local operators
 - Maintenance protocols
-

Services

What We Offer

For Hotels & Resorts:

- Sustainability infrastructure consulting
- Off-grid system design and implementation
- Disaster resilience assessment and planning
- Staff training on sustainable operations
- Japanese market outreach and PR support
- Content creation and documentation

For Condominiums & HOAs:

- Common area backup power systems
- Emergency communication infrastructure
- Disaster preparedness planning
- Resident education programs
- Sustainability improvements for shared facilities
- Asset value enhancement through resilience

For Realtors & Property Managers:

- Off-grid readiness assessment for listings
- Property differentiation consulting
- Disaster resilience as selling point
- Japanese buyer/renter outreach
- Vacation rental upgrade consulting
- Premium positioning through sustainability

For Developers:

- Resilient infrastructure design from ground up
- Sustainability certification support
- Future-proof system architecture
- Off-grid capable design integration
- Disaster recovery planning in development phase

For Tour Operators:

- Sustainable tour program design
- Off-grid experience packages
- Remote location infrastructure
- Japanese tourist outreach and marketing

For Activity Providers:

- Remote site power solutions
- Communication infrastructure for off-grid locations
- Safety and emergency systems
- Eco-certification support

For Tourism Boards & DMOs:

- Sustainable tourism strategy consulting
- Japanese market marketing
- Disaster resilience messaging
- Community-tourism balance planning

For Construction Companies:

- Off-grid system installation partnerships
- Subcontractor for resilience infrastructure
- Technical design support
- Training for installation crews

For Architects & Design Firms:

- Resilience integration from design phase

- Off-grid system specifications
- Sustainability certification pathways
- Future-proof infrastructure planning

For Real Estate Investors:

- Property value enhancement through resilience
- Disaster risk reduction assessment
- Portfolio sustainability improvements
- Japanese investor outreach

For Local Residents:

- Home disaster readiness assessment
- Backup power design for your property
- Emergency communication setup
- Community resilience presentations for HOAs and neighborhood groups
- Connection to local resilience resources

For Communities & Nonprofits:

- Disaster recovery infrastructure support
- Off-grid system installation
- Memorial engraving services
- Gift economy workshops
- Community resilience training

For Individuals:

- Custom memorial engraving
- Portable memorial creation
- Memory preservation consulting
- Off-grid lifestyle consulting

Recognition

Credentials & Media

Awards:

- World Blockchain Summit Top 10 Project Leaders

Media:

- Forbes JAPAN — Contributing Writer

Professional Background:

- Fujitsu — Engineer (4 years)
- Willgate — CTO (7 years)
- Deloitte Tohmatsu Consulting — Senior Specialist (5 years)

Expertise:

- 20+ years in Digital Transformation and AI
 - Enterprise system architecture
 - Startup scaling and technical leadership
 - Disaster recovery and resilient infrastructure
-

Timeline

Our Journey

- **1990s–2000s:** Technical foundation at enterprise company
 - **2000s–2010s:** Startup leadership as CTO
 - **2010s–2020s:** Enterprise consulting at global firm
 - **2023:** Maui wildfires. Decision to pivot toward disaster recovery.
 - **2024:** First Maui deployment. Off-grid systems for disaster recovery.
 - **2025:** Timeless Eternal Hope formalized. Family-based operation in Maui.
 - **Future:** Expanding impact across Pacific islands and disaster-prone regions.
-

Vision

Three Horizons

Today — Mobile Memorial Workshop

Satellite internet, portable power, laser engraver — all in one bag. We go where we're needed and engrave on the spot. Building relationships, one memory at a time.

Tomorrow — Quartz Glass Laboratory

A facility in Japan for creating eternal-grade memory preservation. Internal laser engraving on quartz glass. Memories that survive fire, flood, and time.

Future — Global Memory Gallery Network

Physical locations around the world where memories are preserved and displayed. A network of sanctuaries for human stories. "You existed" — proven and protected, forever.

Community Integration

How We Become Part of a Place

We don't arrive as helpers from outside. We integrate.

1. **Step 1: Observe** — Who feeds the stray cats? Who maintains the public spaces? Who cares?
2. **Step 2: Give** — Handmade soap. Free WiFi. Technical help. No strings attached.
3. **Step 3: Listen** — What does the community actually need? Not what we assume they need.
4. **Step 4: Build** — Create infrastructure that serves the community, not just ourselves.
5. **Step 5: Stay** — Relationships take time. We don't rush. We return.

This is how strangers become neighbors. This is how visitors become family.

Partnership

Why Partner With Us?

For Hotels & Resorts:

Whether you're just starting your sustainability journey or already leading the way, we can help you go deeper — with systems that actually work when it matters most.

- **Authentic story:** We're not consultants flying in from the mainland. We live here. Our ancestors are buried here.
- **Practical expertise:** We've built systems that work in disaster conditions.
- **Japanese market access:** Forbes JAPAN contributor. Native Japanese. Bridge to a market that values sustainability.
- **Content creation:** We document everything. Your partnership becomes a story worth telling.

For Condominiums & HOAs:

After the 2023 wildfires, residents ask: "What happens when the power goes out? How do we communicate? Are we prepared?" We help you answer those questions with infrastructure, not just words.

- **Practical solutions:** Backup power for common areas, emergency WiFi, communication protocols
- **Resident confidence:** Tangible improvements they can see and trust
- **Property value:** Disaster-ready buildings command premium prices

For Realtors & Property Managers:

The market has changed. Buyers and renters now ask about disaster resilience. "Is there backup power? What happens in an emergency?" We help you turn resilience into a competitive advantage.

- **Property differentiation:** "Off-grid ready" as a listing feature
- **Premium positioning:** Sustainability commands higher prices
- **Japanese market:** Access to buyers who prioritize safety and quality

For Developers:

Building new? The time to think about resilience is now — not after the next disaster. We help you design resilience into the foundation, not bolt it on later.

- **Integrated design:** Off-grid capability built in from day one
- **Certification support:** Sustainability standards and certifications
- **Future-proofing:** Systems that adapt as technology evolves

For Tour Operators & Activity Providers:

Your guests want authentic, sustainable experiences. You operate in remote locations where infrastructure is a challenge. We help you deliver both.

- **Remote infrastructure:** Power and connectivity where the grid doesn't reach
- **Sustainable experiences:** Off-grid adventures as premium offerings
- **Japanese tourists:** Access to a market that values quality and safety

For Tourism Boards & DMOs:

Balancing tourism with community wellbeing is your challenge. Disaster recovery has changed visitor expectations. We help you craft a message of resilience and responsibility.

- **Sustainable tourism strategy:** Practical, not just promotional
- **Japanese market expertise:** Direct access and cultural understanding
- **Community integration:** Tourism that strengthens, not strains

For Construction Companies & Architects:

You build the future of this island. Resilience is no longer optional — it's expected. We bring specialized expertise to your projects.

- **Technical partnership:** Off-grid systems designed and installed right
- **Design integration:** Resilience as a feature, not an afterthought
- **Training:** Your team learns to maintain what we build

For Real Estate Investors:

Disaster risk is investment risk. Resilient properties perform better — before, during, and after emergencies. We help you protect and enhance your portfolio.

- **Risk reduction:** Infrastructure that keeps properties functional
- **Value enhancement:** Sustainability as a premium feature
- **Japanese capital:** Access to investors who prioritize long-term stability

For Local Residents:

You live here. You've seen what the wildfires did. You know resilience isn't optional anymore. We're your neighbors, not outside consultants.

- **Personal assessment:** We'll look at your home and give honest advice

- **Community presentations:** We can speak to your HOA or neighborhood group
 - **Local knowledge:** We live here. We understand the specific challenges.
-

What We're Looking For

Our Ideal Partnership

Aligned Values:

- Genuine commitment to sustainability (not just marketing)
- Respect for local culture and community
- Long-term thinking over short-term gains

Practical Support (Family-First):

- Family-friendly accommodation for our family of three — We travel and work as a unit. This is non-negotiable.
- A comfortable environment for our family — kitchen, laundry, space for a child to play. Condo, hotel, single-family home — the format doesn't matter.
- Access to facilities and resources
- Introduction to relevant teams

Mutual Benefit:

- We contribute expertise and labor
- You provide platform and resources
- Together we create something neither could alone

We're especially interested in:

- Hotels and resorts with sustainability programs
- Condominiums seeking disaster resilience
- Realtors differentiating properties
- Developers building new projects
- Tour operators creating sustainable experiences
- Tourism organizations shaping visitor messaging

- Construction companies and architects
 - Investors protecting portfolios
 - Local residents and community groups
 - Properties attracting Japanese visitors/buyers
 - Organizations connected to Hawaiian cultural preservation
-

How to Work With Us

The Process

1. **Conversation** — Let's talk. No commitment. Just exploration. What are you working on? What challenges do you face?
 2. **Site Visit** — We see your property. You meet our family. We assess what's possible.
 3. **Proposal** — We outline what we can contribute. Clear scope. Clear expectations. Clear value.
 4. **Collaboration** — We work together. Hands-on. Present. Not remote consultants — partners on the ground.
 5. **Documentation** — We capture the story. Photos, video, written records. Your sustainability journey, documented.
-

FAQ

Frequently Asked Questions

Q: Are you a registered nonprofit?

A: Timeless Eternal Hope operates as a social enterprise. We're exploring formal nonprofit status. Our work is mission-driven regardless of legal structure.

Q: Do you charge for your services?

A: It depends on the partnership structure. We operate on gift economy principles — value exchange takes many forms. Let's discuss what makes sense for both sides.

Q: How long do you stay in one place?

A: As long as needed to create real impact. We're not passing through. We're

building long-term relationships.

Q: Can you work with properties outside Maui?

A: Yes. Our methods are transferable. Maui is our base, but our vision is Pacific-wide and eventually global.

Q: What about your daughter's education?

A: Our daughter learns through experience and immersion. She's 5 years old, curious about everything, and learning English naturally. This is her education.

Q: Why should we trust you?

A: Look at our track record. Forbes JAPAN contributor. Deloitte background. Systems we've built that actually work. But more importantly — meet us. Trust is built in person.

Q: Do you work with competitors?

A: We're not exclusive. We believe rising tides lift all boats. Your sustainability success helps the whole island.

Q: What if we just want a small project?

A: We're flexible. Not every partnership needs to be comprehensive. Sometimes a single system or consultation is exactly right.

Q: Can you help with Japanese translation/marketing?

A: Yes. Native Japanese, Forbes JAPAN contributor, and deep understanding of what Japanese visitors and investors value.

Q: Why do you need family accommodation?

A: We work as a family unit. Our daughter travels with us, and our partnership with Mina is core to our gift economy practice. Separating us reduces our effectiveness.
