

Bring your clients 1,000-year proof of existence.

The technology is ready. Over 200 use cases mapped.
What's missing is the delivery network.

Existing digital services are optimized for "now" — the millennium preservation layer is structurally absent

BACKGROUND

01

Digital is optimized for "now"

Cloud and social platforms excel at everyday recording. But 100- or 1,000-year preservation is outside their design scope. Different time horizons need different architectures.

02

End-of-life is now societal

Tens of thousands of graves go unclaimed yearly. By 2040, single-person households will exceed 40%. "Who preserves memory?" is now a social question.

03

The millennium layer is missing

Digital estate management, AI recreations — the market is booming. Yet every solution runs on existing infrastructure. A complementary millennium layer is needed.

OUR OFFERING

Q

Quartz glass recording

QR codes inscribed via metal deposition. Zero servers, zero power. SLA 100%, guaranteed 1,000 years. Readable by any smartphone camera.

U

200+ use cases (organized by industry)

End-of-life, weddings, temples, schools, corporations, municipalities, NGOs, hotels, airlines. Ready for direct proposal integration.

E

70+ philosophical essays (9 domains)

Proof of existence explored across psychology, religion, economics, AI, and space. Standalone intellectual content for client proposals.

A

Pearl Soap + Ambassador network

A gift-economy practice and decentralized workshop network ready to scale nationwide. Direct end-user touchpoint.

TokiStorage is not a "competitor" to digital services — it is a complementary millennium layer

POSITIONING

	Digital services (everyday records)	TokiStorage (millennium records)
Medium	Cloud / HDD	Quartz glass (physical)
Best horizon	Now to decades (optimized for daily use)	100-1,000 years (optimized for permanence)
Infrastructure	Servers & power (source of convenience)	None required (GitHub distributed)
Reading	App / login required	Any smartphone camera
Cultural depth	Functionality & convenience at the core	70+ essays + gift economy practice
Social impact	Platform-level contribution	SoulCarrier (unclaimed graves mission)

Three partnership models tailored to your business model, with progressive escalation possible

PARTNERSHIP MODELS

Referra
l

A. Client Referral Partnership

Introduce clients when TokiStorage fits. You receive a referral fee; we handle delivery end-to-end.

E.g.: End-of-life consulting → offer proof of existence / Funeral DX → add memorial option

Joint

B. Joint Solution Partnership

Embed TokiStorage into your consulting engagements. Position millennium records as the "outcome layer" of ESG, revitalization, or DX projects.

E.g.: Municipal DX → community archive / Hotel CX → guest record upgrade

Co-
Create

C. New Business Co-Creation

Launch a new venture together. We bring technology, philosophy, and use cases. You bring market access, credibility, and scale.

E.g.: Memorial-tech startup / Enterprise perpetual archive service

Revenue design ensures all three parties — client, partner, and TokiStorage — win

REVENUE FLOW

Early Partner Advantage

We are approaching consulting firms sequentially. The first firm to partner receives preferential terms — including priority referral conditions and potential regional exclusivity. Early movers shape the partnership.

Six client sectors show particularly high affinity: funeral, hospitality, religious, government, ESG, and finance

CLIENT FIT

Does your client portfolio include any of these sectors?

Funeral & Memorial

Gravestone alternatives, digital perpetual care, bereavement services

Hospitality

Wedding records, hotel CX, anniversary services

Religious Institutions

Perpetual congregation records, visitor DX, cultural preservation

Government & Education

Community archives, disaster records, school history

ESG & Sustainability

1,000-year corporate purpose records, SDG impact proof

Finance & Insurance

End-of-life service integration, digital estate

The founder is a Big Four alumnus who designed the partnership model with full awareness of firm compliance

TEAM & INDEPENDENCE

TS

Takuya Sato — CEO, Universal Need Inc.

Former Big Four consultant — understands firm culture, client engagement, and project design from the inside. 20+ years in semiconductor manufacturing engineering. Former president of Timeless Town Shin-Urayasu residents' association (250 households). Through SoulCarrier's work with unclaimed graves, witnessed firsthand how memories vanish — and conceived TokiStorage. Validated off-grid, institution-free 1,000-year design through testing in Maui and Lake Yamanakako.

Community president (250 households)

SoulCarrier founder

Off-grid validated

Relocating to Sado Island (Spring 2026)

A note on independence

This is a vendor partnership — structurally identical to recommending Salesforce or SAP. No audit engagement, no equity relationship, no independence concerns. Designed with full awareness of firm compliance requirements.

Let's start with a 30-minute conversation.

Partnership structure is flexible by design.
Let's reverse-engineer the right model
from your clients' actual challenges.
